I have also used the IFC file from the youtube link. I wish this helps..When You're On The Road As a professional photographer, I travel with numerous items. I carry my camera, my laptop, my memory cards, my lenses, and my printer. I also carry a camera bag to store and protect those items, and an extra camera, a spare memory card, and a lens cleaner, just in case. And, I travel with a camera charger/expander, battery packs, and my charger too. It's a lot to carry on your travels. Most travelling photographers have no problem carrying all of the extra items described above. Just add a tripod and a memory card bag to your travel equipment list, and you're good to go. However, there are times when it's just not possible to carry all of the extra items and you are faced with the choice of either taking the extra items on your travels, or leaving them at home and going to carry only the bare essentials. In this situation, there are many things to consider before you decide which way to travel c6a93da74d
