work out the  
direction of a  
molecule Given that  
 $\text{H}_2\text{O}$  has

---

different  $\text{p}K_{\text{a}}$  values at different pH values, is it possible to derive the  $\text{p}K_{\text{a}}$  value of  $\text{ce}\{\text{H3O}^+\}$ ?

Would it then be related to the  $\text{p}K_{\text{a}}$  value of  $\text{ce}\{\text{H2O}\}$  as  $1/\text{p}K_{\text{a}} = 1/\text{p}K_{\text{a}}$

---

$\text{H}_2\text{O}$ ? A: The  $K_a$  value of  $\text{H}_3\text{O}^+$  is equal to that of  $\text{H}_2\text{O}$  only in a pure aqueous solvent. In other solvents,  $\text{H}_3\text{O}^+$  and  $\text{H}_2\text{O}$  are usually present at equal concentrations, meaning that the  $K_a$
