Phytotherapy, the practice of using plants for healing, has not been generally approved by the mainstream of modern medicine. In the last decade or so, however, it has gained interest and researchers have begun to document its benefits. The present paper is based on the authors' view that traditional treatment (phytotherapy) is an integrative practice founded in the broad knowledge of the properties of a wide range of medicinal plants and of their interaction with human physiology. Consequently, phytotherapy is the most appropriate practice to combat diseases and to ensure good health.The invention relates to an apparatus for the decontamination of liquids, particularly waste liquids, in which a liquid to be treated is held between a first and a second, circular, magnetized metal tube located opposite each other so that the liquid can be purged with a venting gas.
