
Vamaa Thin Client Software 14

vamaa thin client software 14 is an integrated client software for the vamaa series of PC tools and a software development environment for using the Client Access Toolkit v4. The client software is designed to enhance and simplify the work of customer support personnel. Its main purpose is to enable customers to access information in a dynamic way. An important feature of vamaa software is the ability to bind an external application to the client software to offer customer support while the client is using the remote PC.
