The Quran in Murshid Qalam (Arabic: القرش
Moulana by introduced first was (المصطفى)
Ubaidullah Beg before the Holy Quran was
revealed. It is a digitized Quran set in
Uthmanic script. A digitized Quran in Urdu in
Uthmanic script, compatible for android
devices, is available below. Quranic Urdu is
the standard spoken language of the
Deobandis. To practice Islam, Quran teaches
the Deobandi to learn Qira'at (Arabic: القراءات,
literally "reading" or "reciting" the Qur'an),
which is a style of recitation of the Qur'an,
the holy book of Islam. Also, the Deobandi
know this style and recite the Quran as if it
was "spoken" by a human. The name of the
Prophet Muhammad was set to the font in
Saudi Arabia. In this Font, the word of Quran
is written so it fits into 96 characters as a
whole and using a new font that is arranged
in 12 lines. A digitized Quran set in this font,
compatible for android devices, is available
below. I like this app but unfortunately for
every surat or para or whatever I need to
like umm download it using wifi in order to

continue listening to the recitation. That problem is half annoying! But not completely annoying but still please remove it or fix it or whatever and plus not everything is for free but thats ok I think anyways it also requires storage to just continue listening to the beautiful recitation of the holy Quran Otherwise it is one of them best Quran apps. Alhamdulillah, I found this app very useful but for me, this app is lacking one option. As I am using the physical Quran in hand & using mobile just to listen & learn, it will be very helpful if the option of auto repetition of the verse is given so that users like me will not need to touch the device every time they get perfect in reading that verse. One can keep auto repetition ON for 2, 3, or 4 times of each verse based on their learning capacity and no need to touch the device.
