You can also check the Stunning and Pro-Master Firmware versions. If your Avid version is a downloadable standalone iLok or Pro Tools version, check the version number at the bottom of the screen. If its an upgrade of the standalone product, check your software download link and match it with the Firmware version. If you cant find them, then its another iLok error. The only other method you have is to buy a new iLok. Others wont save your day. Its very easy, go to the Sweetwater Avid Master Account/Apple ID/Software License then click on the “Login” button. Once there, click the “Update now” button and then select iLok, Pro Tools, or multi-system. And, then find your serial number on the list of licenses you can select from and

that will be your activation. It can be a lot of frustration when one gets into a problem they cant solve. And by that, we mean even after all this hard work. Please be informed that missing Pro Tools 10 iLok authorization or activation, the most common one for most people, can be caused by incorrect installation, virus attacks or Windows errors. Maybe, the reason is the installation of a new application that created lots of unallocated space on your hard drive. Sometimes, a problem is caused by system registries and configuration files that are being corrupted or damaged. This happens when one runs an incomplete software uninstall or install. Sometimes, an error can be caused by a virus that is detected in your system. Hence, it can be annoying because sometimes the error, especially a missing iLok license, can be caused by your antivirus or even if your hard drive has a problem. But, if you still are unable to solve the error, you can do a system restore, which will help restore your previous settings and remove some of the problems, which is the last resort.
