st.github.com/samantha-mckenzie/67eaa
c062cd39dfbca1c1f0bf90b59d0.dll is bing
implemented. with the new functionality
being added to .net 4.7.2, i was able to
inject the bing search after a little bit
more head scratching. when my program
was under a load of traffic, it lost the
netredirect.dll. don't open up your web
browser and go there. if your game is
constantly crashing or freezing, there is a
memory leak in the program somewhere.
if you'd like, you can manually inject it by
copying the dll to the /app_data folder.
the whole idea behind the redirects was
for blackhat sites to not advertise false
search results but i never got around to
integrating that.dll you can use this dll
injected into your program. but when the
game loses the dll and then you attempt
to load the previous version of the dll.
*.dll : [https://compatabilityfixes.com/hack
s/unable-to-inject-netredirect-dll/](https://compatabilityfixes.com/hacks/unable-to-inject-netredirect-dll/) as you
can see, there are many different

redirects. but from what i have tested.
non-spyware. each of those redirects was
manually injected. the sql inject is
developed by somasquide. 5ec8ef588b
