
Silent Hunter 4 Patch 1.5 15

I can play SH4 1.4 patch without any problems. The game works fine. Then, when I install the 15. Uboat mission, it installs without ... I know this is not a very important part, but I don't want this to happen. I am using Windows 7 64 bit. At the end of the day, I just want this game back. I don't want to pay for this patch because games become free if you play them with patches. I don't want the system to track what I'm doing, and I don't want them to be able to easily stop me I don't know if there is any software for this or anything else. Either way, I would really like to get the game back.
