Spore Creepy And Cute No Cd Crack

sporocystthe sporocyst costs the same as the tyrannocyte and becomes an immobile bunker. it has the same load out options as well as stats from the spore pod with the extra rule of increasing the synapse range of synapse creatures that are near it as well as spitting out 3 spore mines during the shooting phase. once per battle it can spit out the other option from this kit as well that i will go

over later. this is an interesting kit that i dont think will see much of. it does some neat things but not being able to move is a bummer. if it deepstriked in i might put this in a better place but as of right now it just seems more cute then actually necessary. maybe if it gave out shrouding or some kind of protection spell it would be great to have holding your back field. the model can at least infiltrate but still i just dont see that winning you the game instead of some kind of big monster etc.
