November 22, 2021 To continue receiving security and quality updates, Microsoft recommends updating to the latest version of Windows 10 on 17/11/20. The update will also fix issues found over the past few months. We will also cover the following important security fixes: We fixed a security issue in Windows that could cause Office activation to fail due to errors in the activation mechanism. We fixed an issue that could result in data corruption with a denial of service attack that could result in a denial of service for services performing data synchronization.
