Sins Of A Solar Empire Rebellion Trainer 1.03 4243

i am really tired of saying "hey developers, we want cheats!". you all are working on a project and we, the player base, have no choice but to sit here and let you work on this product, and it isn't like you all make enough to buy your own bills. so, why don't you take the time to make a trainer and add a cheat into the game? i am not one of those people that plays just to play the game. i play it because i enjoy the game. i would like to play the game my way. i like to build and destroy without having to buy something just to have the option to do so. why don't the developers put in the cheat and let me play the game my way? will the developers ever put in cheats and trainers. i have never seen a trainer or mod that will do this. i would love to see a trainer or mod that will allow me to play the game as a normal player. i am tired of waiting for the developers to make a trainer or mod. i have been waiting for years to see something. if you are wondering why you should use sins of a solar empire: rebellion trainer, and not the game's built in trainer, there are two reasons. the first is that the built in trainer is incomplete. it may seem like a good deal at first, but as you play the game you will realize that it only gives you a glimpse of what the game has to offer. the second reason is that the built in trainer seems like it is mostly for the game's interface. the trainer provided by this cheat actually lets you play the game without it's interface. if you have ever played an fps game, you know that the interface is

what makes the game play in a strategic way. without a interface, you can be playing the game in an action way. so this trainer makes the game play like an action game!
