July 18, 2018 - Access 2002 Runtime is no longer supported by Microsoft and I have a database program that won't work since the latest Windows 10 update. 😩 I've had this database program since 2003 and everything was working great until Microsoft released an update known as Windows 10 Build 1511 (previously known as Windows 10 April 2018 Update) that changed the way you use Access. Microsoft has released an update to enable the use of the Access 2002 Runtime to create, manage, and access business data in Office Web Apps. I'm using Access 2002 Runtime on my development server and it works great.

The 2002 runtime was only available if you purchased the developer extensions, so I doubt you'll find it all over the place (and if you .# ## I had a problem updating Office Xp Service Pack 3. Failed to save the update and got an Office XP Service Pack 3 for Access 2002 runtime message. If you want to use the version that existed before XP came out, you would need to use Access 97 or earlier, like Access 97, which I used when I needed to work in the MSDN Runtime or something similar. It may not be the best solution, but that's it. If you didn't find it, you'll have to upgrade to Office XP. I'm not sure how you work with it, but once installed, you can run "Microsoft Access 2002 Tools/Runtime Tools". dd2bc28256
