working on a project and using Windows
10 machine. I have python 3.6.2 and
pip 19.1.1. I have installed Tensorflow-
gpu 1.14 using the following instruction

which requires pip or pip3 pip install pip
pip3 install pip This works fine. When I
try to uninstall it using conda uninstall
tensorflow-gpu as suggested in
Installing pytorch requires more than
pip - It only installs a dependency, I am
getting the following error message:
